

Optomap Implied Consent

Lewis County Eye & Vision is proud to provide our patients with the most highly advanced technology available in retinal screening today! Our ability to view your internal retinal health is now dramatically improved with the Optomap.

Your doctors are concerned about retinal problems such as macular degeneration, glaucoma, retinal holes or detachments and diabetic retinopathy (all of which can lead to partial loss of vision or blindness). Additionally, systemic diseases such as diabetes and high blood pressure can be detected during a retinal exam before physical symptoms are diagnosed by your regular physician.

EARLY DETECTION IS CRUCIAL

Optomap Provides:

- An annual eye wellness scan
- An in depth view of the retinal layers (where disease can start).
- The ability to show you your images today during your exam.
- A permanent record for your medical file, which gives your doctor comparisons for tracking and diagnosing potential eye disease.

Optomap:

Is fast, easy, and comfortable.

Will NOT require dilating drops (which may result in blurred vision and sensitivity to light).

Because your insurance is designed to cover only a routine eye exam, it does not cover advanced screening tools such as the Optomap, unless there is a medical diagnosis. The fee is \$39.00 payable at time of service. Lewis County Eye & Vision would like ALL of their patients to have an Optomap exam to supplement their annual eye health examination.

_____ I elect to have an Optomap of my retina.

Patient Signature: _____

Date: _____

If you decline the Optomap exam, it may limit our ability to accurately determine the health of your eyes and must sign below.

I decline the Optomap exam _____

Date: _____

Your technician will be happy to answer any questions you may have about the Optomap.
